DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 27, 2006 has been entered.

Claim Objections

2. Claims 1-4 are objected to because of the following informalities: In claim 1, line 2, there is no direct antecedent basis for "the fibers". Appropriate correction is required.
3. Claim 5 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 1. The only difference between these claims is in the recitation of "topsheet" in line 1 of claim 1 and "fibrous sheet" in line 1 of claim 5. However, claim 1 does recite fibers in line 2. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Allowable Subject Matter

4. Claims 1-4 would be allowable over the prior art, with the correction as indicated above to claim 1.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach the protrusions on the lower side projecting laterally in the planar direction and extending at least partially over an adjacent heat fusion joint in combination with all the other limitations of claim 1.

Response to Arguments

6. Applicant's arguments see pages 5-7, filed June 27, 2006, with respect to claims 1-4 have been fully considered and are persuasive. All previous rejections have been withdrawn.

Information Disclosure Statement

7. The information disclosure statement filed April 27, 2006 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.
